Environmental Product Declaration

EPD of multiple products based on a representative product in accordance with ISO 14025:2006 and EN 15804:2012+A2:2019/ AC:2021 for:

BATWING
for MOVE IT 25 S

from XAL GmbH

Included products
Batwing 305 | Batwing 605 | Batwing 1205 (=reference product) | Batwing 2405

Programme
The International EPD® System
www.environdec.com

Programme operator
EPD International AB

EPD registration number	EPD-IES-0015810:001
Publication date	2024-09-30
Valid until	2029-09-29

This EPD follows additional requirements for construction products considered as Electronic or Electric Equipment. An EPD should provide current information and may be updated if conditions change. The stated validity is therefore subject to the continued registration and publication at www.environdec.com

Approved by
The International EPD® System

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

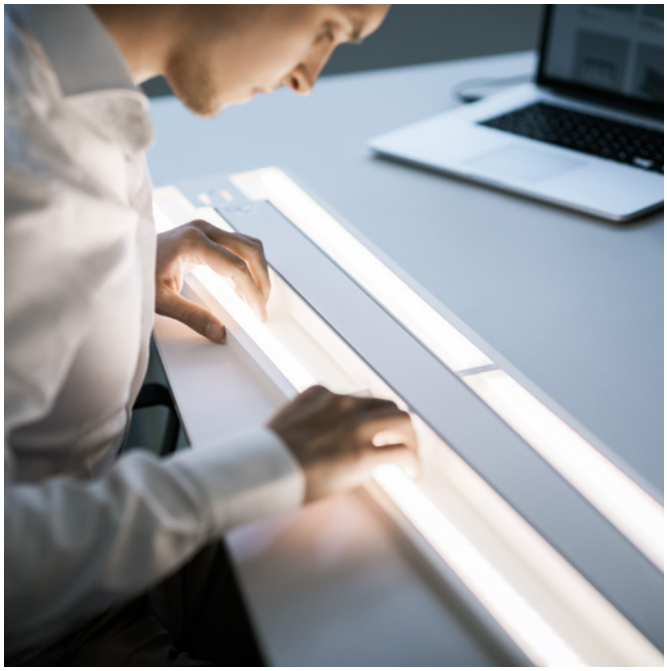
EPDs within the same product category but registered in different EPD programs, or not compliant with EN 15804:2012+A2:2019/AC:2021, may not be comparable. For two EPDs to be comparable, they must be based on the same PCR (including the same version number) or be based on fully-aligned PCRs or versions of PCRs; cover products with identical functions, technical performances and use (e.g. identical declared/declared units); have equivalent system boundaries and descriptions of data; apply equivalent data quality requirements, methods of data collection, and allocation methods; apply identical cut-off rules and impact assessment methods (including the same version of characterization factors); have equivalent content declarations; and be valid at the time of comparison. For further information about comparability, see EN 15804:2012+A2:2019/AC:2021 and ISO 14025:2006.

Company information

Owner of the EPD

XAL GmbH
Auer-Welsbach-Gasse 36
8055 Graz
AUSTRIA

epd@xal.com



Description of the organisation

XAL is an internationally operating manufacturer of high-end luminaires and lighting solutions for shop, office, hotel and residential lighting. For 30 years, XAL has been working with lighting designers, architects and planners to develop custom luminaires of the highest technical standard, with a focus on style and aesthetics. While XAL mainly targets B2B costumers, we also provide our standard portfolio to B2C costumers.

With its headquarters in Graz, Austria, the XAL Group currently employs 1300 people worldwide and has 30 international subsidiaries. We are continuously working on further improving our products – whether in terms of durability, efficiency, the carbon footprint, or also with regard to the replaceability and reusability of components and materials.

Product-related or management system-related certifications

XAL is certified according to several management and CSR standards.

- **ISO 9001** – Quality management systems
- **ISO 14001** – Environmental management systems
- **ISO 45001** – Occupational health and safety management systems
- **Ecovadis** – regular evaluation of our corporate social responsibility based on objective criteria with a focus on the environment, labour and human rights, ethics and responsible procurement.
- **UN Global Compact initiative** – our interactions with each other and our stakeholders, our supply chain management and our resource strategies are guided by the principles of the UN Global compact.

Name and location of production site(s)
The production sites are located in Murska Sobota (XAL Svetila d.o.o., Slovenia) and in Graz (XAL GmbH, Austria).

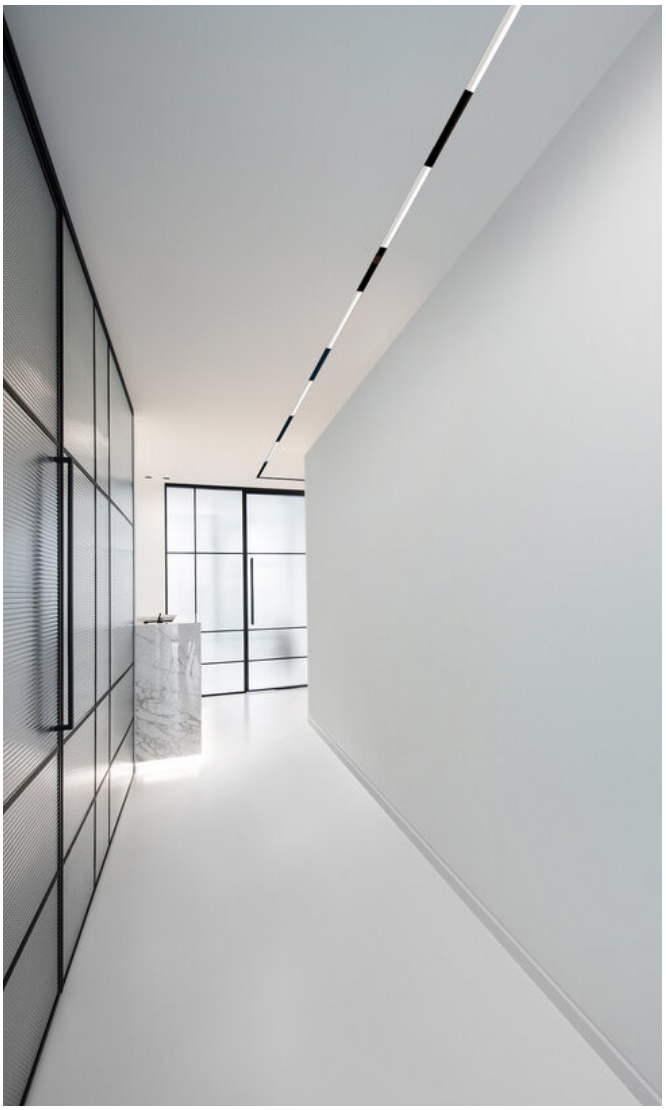
Product information



Product name

BATWING
light inset for MOVE IT 25 S

Product identification

In the MOVE IT 25 S rail system, spotlights, newly developed linear office inserts, and decorative lights can be combined. These are magnetically mounted and can be adjusted to spatial changes without the need for tools, offering flexibility. The linear light insets of the MOVE IT 25 S product family can be used in many different variations. Available with different optics, a wide range of beam characteristics can be generated.

This EPD covers several variations of the BATWING Insets for MOVE IT 25 S

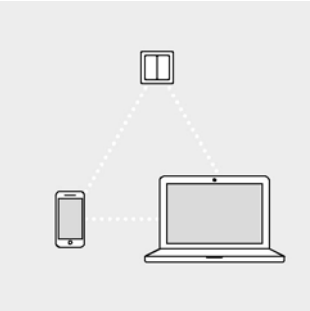
- **BATWING 305**
- **BATWING 605**
- **BATWING 1205** (=reference product)
- **BATWING 2405**

Product information

Product description

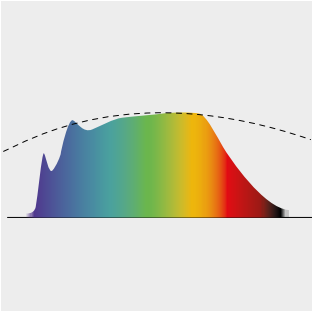
Linear light inset made of aluminium; light inset can be installed and moved without tools by means of magnetic holders+locking; surface anodised; flush with profile system; with specially computed BATWING lens for wide light distribution; with CSP (Chip-Scale-Packaging) technology for maximum efficiency; energy-efficient LEDs with very good colour rendering; hot plug protection. DALI single control.

Product features



Control Options
Easy control of the luminaires

Magnetic Mounting
Installation and assembly are quick and easy



Full Spectrum LED
Healthy and eye-friendly light

CB

The products covered by this EPD are thoroughly tested in our externally accredited in-house facilities. CB is available.

UN CPC code(s):

- 4653 (Ver. 2.1) Lighting Equipment

LCA information

Declared unit

The declared unit is one piece of the BATWING for MOVE IT 25 S including the LED-Converter.
The weight of the product per declared unit is 0.700 kg.

For better comparison with other types of luminaires, conversion fac¬tors are also available to convert the results to 1000 lumens during a reference lifetime of 35000 hours. This reference value is proposed by the PEP Category rules (PSR-0014-ed2.0-EN-2023 07 13). The conversion factors are available under “Additional environmental information“.

The principles of “Modularity” and “polluter pay” have been followed.

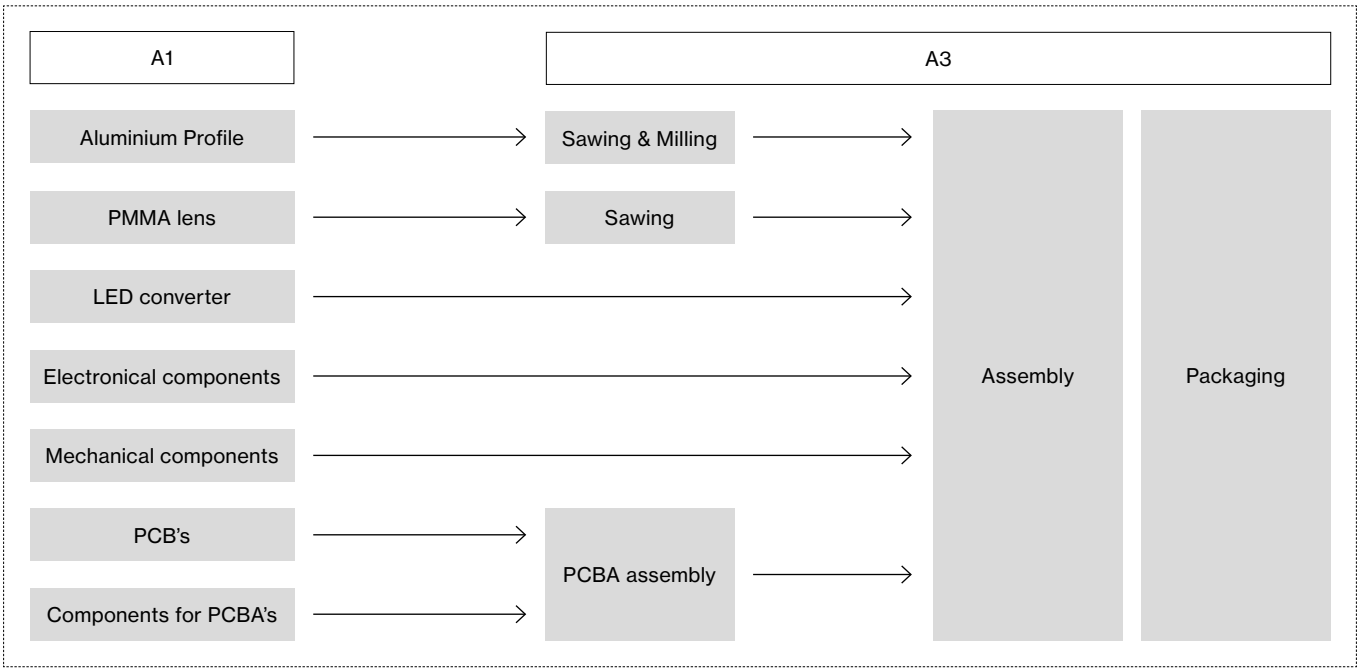
Reference service life
13.25 years

Time representativeness
2023

Database(s) and LCA software used
LCA for Experts 10.7.1.28

Description of system boundaries
Cradle to grave and module D

System diagram (A3 – Manufacturing)



Product stage (A1 – A3)

Raw materials are found in the components used for the luminaire production. The raw materials and the necessary process steps have been modelled using LCA for Experts. The Population of the PCBA is done in Graz, Austria. All components are then supplied to Murska Sobota, Slovenia where sawing and milling of the aluminum profile, sawing of the lens, and the final assembly of the luminaire is done. The corresponding electricity mix has been used for all manufacturing steps. Transportation of all the components is incorporated. For the components which are delivered from China, aggregated data has been used, since transportation involved various routes and transport vehicles. Packaging for the components has been accounted for using a worst-case approach. The ESD-packaging is reused one time within the company, therefore only ½ of the weight is taken into account for the production and the recycling. Since connectors typically consist of various material compositions, the EPDs of XAL GmbH assume plastic/metal connectors with a ratio of 50/50.

Transport to building (A4)

Transport is modelled for countries where the sales share is more than >4 % and modelled to the capital cities (Berlin, London, Zurich, Rome, Vienna, Copenhagen, Stockholm).

The product market includes countries all over the world.

Weighted distance	979.44 km
Truck used	Class EURO 6, 26-28 t
Fuel type	Diesel (0.00287 kg/100 kkm)

Installation into building (A5)

No emissions occur during the installation. This module includes the waste treatment of the packaging. For the transport-packaging, the euro pallet is reused 28 times, therefore only 1/28 of the weight is taken into account for the production and the end of life of the pallet.

Packaging waste including product and transport packaging:

Material	Weight (kg)
Cardboard	0.598
Polyethylene film	0.007
Wooden Pallet	0.006

Use, maintenance, repair, replacement and refurbishment (B1, B2, B3, B4, B5)

These stages include the use, maintenance, repair, replacement and refurbishment of the product, which do not contribute to the environmental impacts of the product's declared unit.

Operational Energy Use (B6)

Electricity consumption during the use stage is modelled based on the technical parameters of the luminaires and is representative for a reference service life of 13.25 years with a weighted average of the following applications – office (60 %), hotel (15 %), restaurant (15 %), and retail (10 %). Geography of the electricity mix is modelled by sales shares and is representative for European countries (91.57 % - EU-28) and rest of world countries (8.43 %). For the rest of world countries, an electricity mix for China is used following a worst-case approach.

The energy consumption is calculated using the formula from EN 15193:2007: **Energy consumption [kWh] = {Pa x FCP x FO x (FD x tD + FN x tN) + Pp x ty} x 1/1.000 x a**
The results are presented in the additional information chapter.

Scenario	BATWING 1205	Unit
Electricity use (13.25 years)	905.17	kWh
Active power	21.30	W
Passive power	0.2	W
Total active time	41406.25	hours
Total passive time	74663.75	hours
Dimmable	non-dimmable, DALI-2 control	-
Presence control	No	-

Operational water use (B7)

No water is consumed during the use stage. Therefore, this stage does not contribute to the environmental impacts of the product's declared unit.

End-of-life stage (C1 – C4)

The product is presumed to be decomposed manually; therefore, no emissions should occur. For the corresponding waste destinations, the following distances are used:

- To recycling facility – 250 km
- To incineration facility – 50 km
- To landfill – 100 km for metal and electronic parts, 20 km for plastic parts and packaging waste

Based on official statistics and literature, waste treatment options are taken into account for Europe and rest of the world countries.

Scenario (luminaire + mounting accessory)	BATWING 1205	Unit
Collected separately	0.700	kg
Collected with mixed (construction) waste	-	kg
For reuse	-	kg
For recycling	0.285	kg
For energy recovery	0.213	kg
For final disposal	0.202	kg

Module D

According to the guidelines of EN 15804+A2 and the PCR from EPD International, calculations are made for Module D. The loads and benefits result from the export of secondary materials and the energy which comes from incineration and landfilling. In Module D also the benefits from the product packaging waste are included.

Scenario (contributing materials, incl. packaging)	BATWING 1205	Unit
Materials for recycling	0.772	kg
Materials for export of secondary fuels	-	kg
Materials for incineration	0.277	kg
Materials for land filling	0.262	kg

Cut-off rules

Consistent with the PCR, a minimum of 95% of total inflows (mass and energy) are included. In addition, materials and processes with insignificant contributions of less than 1% are also included. For the use and end-of-life stage, scenarios are used, factoring in geographical conditions (such as electricity mix) and applications (waste treatment practices).

The following processes have been excluded:
- Manufacture of equipment used in production, buildings or any other capital goods;
- The transportation of personnel to the plant;
- Transportation of personnel within the plant;
- Research and development activities;
- Long-term emissions.

Data quality

Based on site specific information, this LCA study reflects the production for 2023. Components are supplied by external vendors, therefore manufacturing processes are modelled using LCA for Experts, with the best fitting representative geographical conditions and applications.

Electricity grid

For the manufacturing in Graz, Austria, the corresponding electricity grid mix as stated on the invoice is used: Hydro (87.3%), Wind (8.4%), Solar (2%), Biomass (1.4%), other RE (0.9%).

For Murska Sobota, Slovenia, the electricity used is 100% from Hydro Power.

Environmental impact of the electricity used in	AUT	SLO
CO_2 eq. [kg/kWh]	0.008	0.005

Additional environmental information

All Batwing Insets for MOVE IT 25 S belong to an environmental homogenous family as described in chapter 3.6.1. of the PEP-PCR-ed4-EN-2021 09 06:
-The materials and manufacturing processes of the luminaires are identical and only differ in mass
-The packaging materials and manufacturing processes are identical
-The products use the same logistic circuit
-Installation and use conditions are the same
-The technology of the light source is the same
-The luminaires are recycled according to the same regulatory requirements

The calculation of the scaling factors are based on the extrapolation rules of PeP described in chapter 3.6.2. – 3.6.8. (P.E.P.. 2021).

	Conversion factors					
Variant	**A1–A3**	**A4**	**A5**	**B6**	**C1–C4**	**D**
305	0.26	0.25	0.25	0.25	0.24	0.26
605	0.53	0.50	0.50	0.50	0.50	0.53
1205	1	1	1	1	1	1
2405	1.70	2.46	2.09	1.99	1.97	2.07

Results for 1,000 lumens during a reference life of 35,000 hours (PSR-0014-ed2.0-EN-2023 07 13)

A conversion factor can be used for converting the results to 1 000 lumens during a reference life of 35 000 hours.

Variant	**A1 – A3**	**A4**	**A5**	**B6**	**C1 – C4**	**D**
BW 305	1.81	1.81	1.81	1.53	1.81	1.81
BW 605	0.91	0.91	0.91	0.77	0.91	0.91
BW 1205	0.46	0.46	0.46	0.39	0.46	0.46
BW 2405	0.23	0.23	0.23	0.19	0.23	0.23

Information related to the sectorial EPD
This EPD is not sectoral.

Differences from previous versions
This is the first version of the EPD.
