w225 lon

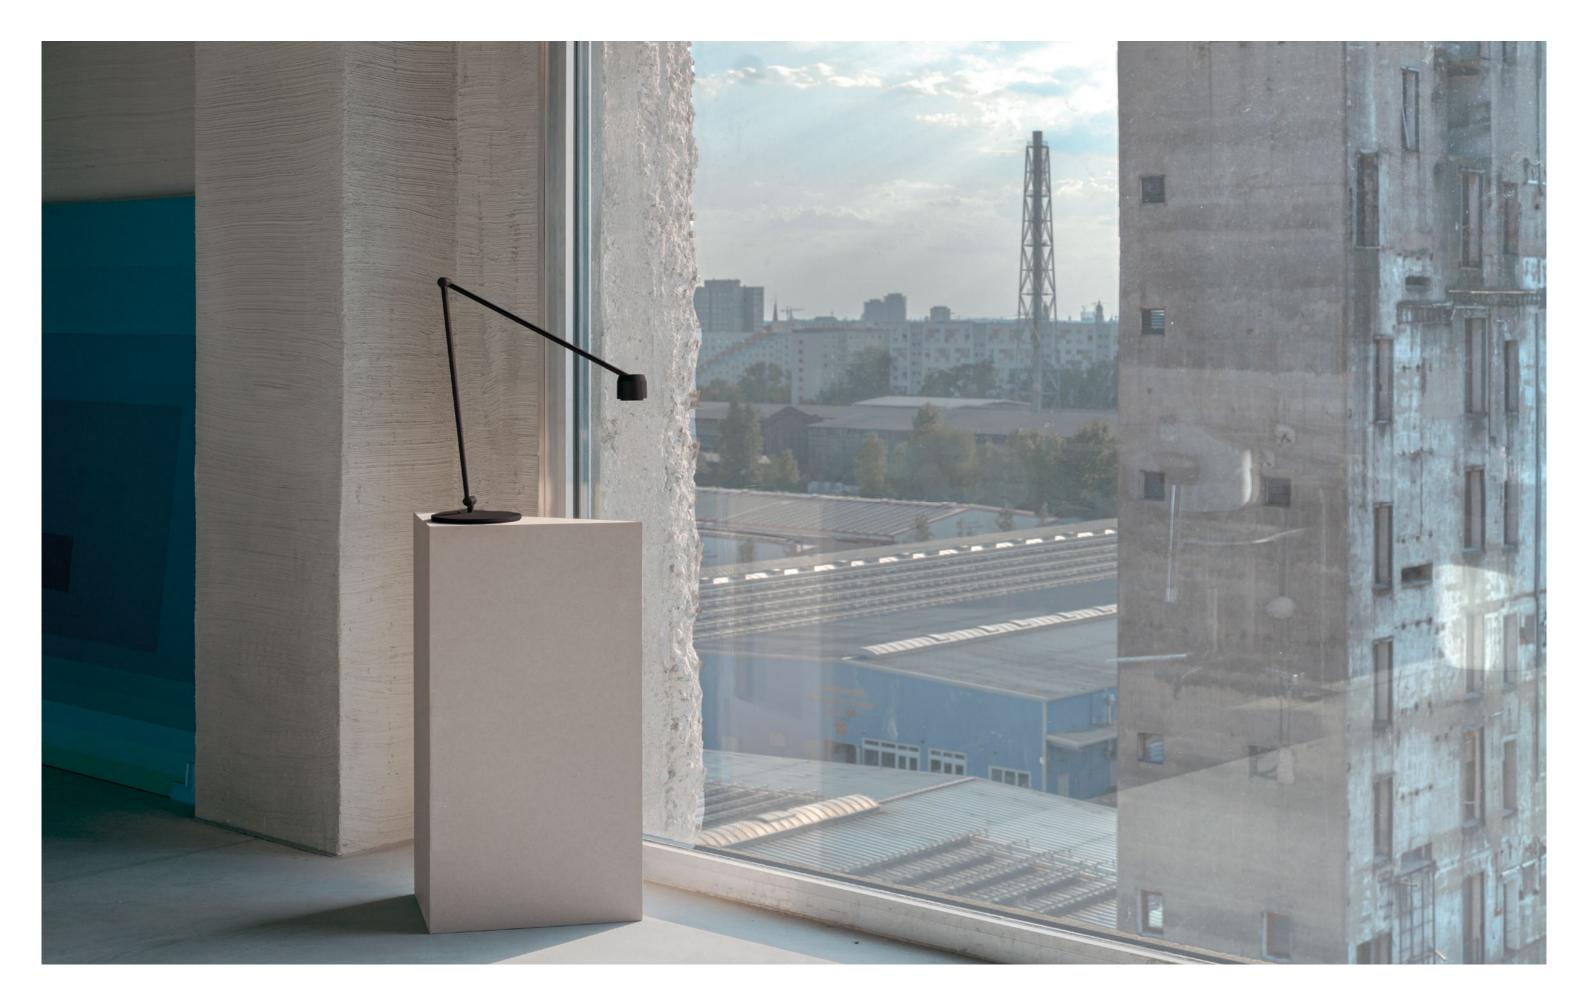

Don't let w225 lon's delicate lines deceive you: This is the ultimate result of research, a journey into light technology and mechanical engineering. Behind its understated lines lies a beautifully configurable system of light. Its mechanics centre around a highly sophisticated miniature friction joint with cordless power connection, allowing 360° rotation. From wide-angle workspace illumination to focused bedside reading light, w225 lon is truly designed for versatility – while offering light that is nothing short of exceptional.

Design:	Dirk Winkel, 2022
Features:	Exceptional light Cordless 360° joint Endless possibilitie Two angles of light Full-spectrum LED

Product:

Exceptional light

The lighting technology in w225 lon is the result of a perfect balance between several ingenious components, each playing its own role in delivering exceptionally high-performance illumination. The state-of-the-art-full-spectrum COB LED provides absolutely stunning light further refined by a high-quality lens. A sophisticated heat management system and effective glare protection optimise the lifespan and performance of the LED, while allowing for comfortable use.

A choice of two colour temperatures

The light is available in two different colour temperatures - 2700 K or 3000 K.

2700 K 3000 K

Two angles of light

Available in two different optical systems, depending on the light you want to create: wide and even, or narrow with a clear-cut spotlight definition.

Full-spectrum LED

Designed to recreate the full, uninterrupted colour spectrum of sunlight, full-spectrum light has a rich, profound quality that is impossible to achieve with the limited spectrum of a standard LED. Full-spectrum light also offers superior colour rendering, making it an ideal choice for environments where correct colour perception is a vital aspect.

Cordless 360° joint

The core of w225 lon's mechanical design is its miniature friction joint, the result of dedicated research and development. While akin to the joints used in modern laptops, this solution features a much wider movement range of 360°. Solidly built, it allows for fluid yet exact positioning at any angle - and then stays put, even after countless readjustments.

some versions.

Raw

w225 Ion is available in a tumbled raw aluminium finish, with no added coatings or protective treatments. This allows for resourceefficient production, easier recycling, and a graceful ageing process. Already from the start, its naturally textured surface, that may show imperfections from the production process, has a rich, tactile depth: over time, marks, stains, fingerprints, and oxidation will evolve into a beautiful, distinctive patina.

Endless possibilities

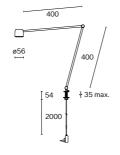

A choice of arms in two different lengths, combined with various mounting options, allows for a wide range of lighting possibilities. Task light or reading light, floor lamp or wall mounted - it's all up to you. All elements are available in black or white. In 2024 we introduce an additional tumbled raw aluminium finish for
